Temporary Position
Available Immediately

The Erickson lab at Cornell University has an open position for an undergraduate researcher with an interest in helping to put together a special issue of a peer reviewed journal. Initial duties will include compiling a database of researchers working within the field of nanofluidic devices and sensors and will require ~2 weeks full time work (if done over the winter break). Experience is not necessary. Pay for the position will be hourly and in line with Cornell standards.

If you are interested please contact Professor Erickson (de54@cornell.edu) as soon as possible.
